

BC Conservation Data Centre: Species Occurrence Report

Shape ID: 122770

Scientific Name: *Cercyonis pegala incana*
English Name: Common Wood-nymph, *incana* subspecies

Identifiers

Occurrence ID: 15343
Shape ID: 122770
Taxonomic Class: insects
Element Group: Invertebrate Animal

Status

Provincial Rank: S2?
BC List: Red
Global Rank: G5T4T5
COSEWIC:
SARA Schedule:

Locators

Survey Site: QUADRA ISLAND, GOWLLAND HARBOUR
Directions: West-central Quadra Island to Gowlland Harbour and east to south of Heriot Bay.
Biogeoclimatic Zone:
Ecosection: JOS;SOG;OUF

Area Description

General Description:

Vegetation Zone:

Min. Elevation (m):

Max. Elevation (m):

Habitat: TERRESTRIAL: Roadside, Savannah, Woodland Mixed

Occurrence Information

First Observation Date: 2018-PRE

Last Observation Date: 2018-08-15

Occurrence Data:

Common Wood-nymphs, incana subspecies observed and photographed along roads and on a large private property on Quadra Island in 2018 and previous years (L. Loiseau-Tremblay, pers. comm. 2019).

Occurrence Rank and Occurrence Rank Factors

Rank: BC : Good or fair estimated viability

Rank Date: 2018-08-15

Rank Comments:

Species appears to be common across island.

Condition of Occurrence:

Size of Occurrence:

Occurrence is comprised of three line features (roads) and one point feature and one large polygon (approx. 127 acres) representing observations of Common Wood-nymphs, incana subspecies, in 2018 (L. Loiseau-Tremblay, pers. comm. 2019).

Landscape Context:

Version

Version Date: 2019-01-08

Version Author: Davis, H.

Mapping Information

Estimated Representation Accuracy: Medium

Estimated Representation Accuracy Comments:

Confident that full extent is represented by Occurrence: N

Confidence Extent Definition: Confident full extent of EO is NOT known

Additional Inventory Needed: Y

Inventory Comments: Species not reported on island before 2018, more inventory needed.
